

RAVENNA –SPORTS HALL “PALA DE ANDRE”

DESCRIPTION

The sports hall has predominantly horizontal development and the central area is bordered by a main building with two floors in which have placed all the services. The shape of the dome allows to increase the space available for the spectators. Inside the building there are the tracks used for the movement of the stands that can be brought out and placed next to an ice rink: This technical solution makes the multi-purpose sports hall.
